

Add or Update a GNAF Address

Overview

This article explains how to add or update a GNAF address in Cumulus.

To add addresses in bulk, use the [Carrier Location Availability import](#) tool.

How to Add or Update a GNAF Address

To add a GNAF address, log in to Cumulus and navigate to **Services > Address**. Perform a search before adding a new address to ensure it doesn't already exist.

Address List

Search form fields: ID, Lot Number, Site Name, Unit Type, Unit Number, Level Type, Level Number, Street Number, Street Name, Street Type, Street Suffix, Suburb, Postcode, State, Country.

Service ID: []

Carrier: Frontier Networks

Buttons: Search, Clear, Add New Address, Export Address List

ID	Lot No.	Site Name	Unit Type	Unit No.	Level Type	Level No.	Street Start No.	Street End No.	Street Name	Street Type	Street Suffix	Suburb	Postcode	State	Associated Services
No Result Found															

Click **Add New Address** or click on the ID of the address you want to modify and then complete the required fields. When you are finished, press **Submit**.

Add New Address

Street Name: Cohens

Street Type: Way

Street Suffix: Street Suffix

Suburb: Frankston

Postcode: 3199

State: Victoria

Country: Australia

Buttons: Submit, Cancel

The presence of an address **will not** mean the address will pass a service qualification. Once the address has been added, you will need to supply the carrier location availability data. Refer to [Assigning a Location Profile ID to an Existing Address](#).

The [Carrier Location Availability import](#) will permit you to import the address and assign a location availability record at once.
