

End User APIs

[Go to full article](#)

Overview

From a mobile app to an end user portal, these APIs will assist you integrate your end user-driven application with Emersion's system.

URL

The URL for the end point is <https://userapi.emersion.com>

Authentication

Prior to making any call, the application is required to authenticate.

Authentication is achieved using the [log in call under the Authentication end point](#). A session token is returned. This token must then be used in every subsequent API call.

Sessions are automatically set to expire 12 months after they are created
