Overview

This article explains how money earned from commissions appears on an [Agent's](#) invoice.

Commissions on an Invoice

Commissions will appear on an agents invoice under *Miscellaneous Fees*. The earned amount will be listed as a credit to the agents account.

Agents can use their invoice as a proof of how much they are owed.

 Depending on the [Invoice Template](#) and design settings used for an agents invoice, the earned amount could be displayed as a credit or it could be displayed as a negative debit. See below for examples.
